

FORGED PRODUCTS

Forged products are suitable for a wide range of applications. Our product range consists of completely machined machine shafts, impeller shafts, gearbox shafts, rings, rudders, pivots and much more.

Depending on the specific requirements we can rely on our broad network of notable European

suppliers. They each have their own expertise and special skills.

Final machining will be done by us in-house and in addition we can offer any required chemical or mechanical testing, inspection and certification.

SPECIFICATIONS

- ⚙ Certified materials include e.g. carbon and CrNi alloys
- ⚙ Inspection/certification by notified body is possible upon request
