

SERVICE & REPAIR

Matecs regularly provides overhaul and repair services, both on site as well as at our own facility. These services may consist of disassembly, repair or replacement of parts and final reassembly. Repair of specific parts can be done by our own welding and machining team.

We have a standard procedure for repairs and overhaul. During disassembly, all findings are recorded in a damage report. A repair proposal is then drawn up in consultation with you. Final testing may be conducted by you or by an independent notified body.

SPECIFICATIONS

- Broad range of hydraulic or electrical tools
- Heating and cooling equipment
- Pressure testing
- In-house lifting capacity up to 50 tons
- Experienced staff
